- ✓ Bottleneck
- ✓ Line Balancing
- ✓ Utilizing Talent
- ✓ Pull System
- ✓ 5s Workplace Organization

Course Description:

APC's Lean Manufacturing training course teaches you the concept of Lean and how it can be used to make your process run more efficiently and with greater output. You will learn to identify which processes are value added as well as learn to pinpoint wastes in your workplace procedures. A Lego demonstration is used to teach you how to analyze your processes and streamline your work. In this course, you will learn: workplace organization and layout techniques, tools for evaluation, ways to implement changes, how to best utilize employees, and more.
